Two people said to be fashion designers in Benin yesterday died after inhaling fume from a power generator.

The deceased lifeless bodies were said to have been discovered by operatives of Esigie Divisional Police station after the shop door was forced open.

The victims allegedly put on the generator inside their shop while working on Monday night along Second East Circular Road.

It was said that one of the victims, simply identified as Obianuju, invited her friend to her shop to work with her deliver materials on time to her customers.

Obianuju allegedly invited her friend for help after her apprentices had turned down her request to work through the night.

Effort to get a comment from the police was unsuccessful as calls put across to the state commissioner of police, Johnson Babatude Kokumo, were not answered and a text message sent to him was also not replied.
