Boko Haram yesterday released a new video, purportedly showing the execution of three alleged Federal Government spies on its operations in the Northeast. It beheaded one and shot two others with a Kalashnikov rifle.

The sect in the seven-minutes video also accused the three spies of working for the Directorate of Military Intelligence (DMI) to infiltrate the group.

Boko Haram in the video displayed a large cache of high-grade military weapons, including what appeared to be anti-aircraft missiles. The terrorists group also boasted that it has not been decimated as claimed by the Federal Government and remains in a place in Nigeria that the military could not “locate and recapture.”
