Toib's intestines reportedly gushed out in the process, the development which made other students to scamper in fear, and drew the attention of their teachers to the incident.

"We tried all we could to save the Toib's life but he gave up the ghost as the intestines have already gushed out while there was nothing we could do than to invite the police," one of the school teachers who pleaded anonymity said.

The situation was still tense at the school by Friday evening as parents stormed the school to confirm the safety of their children.
