

6 Killed, 10 Injured On Failed Ejeme-Anior/Asaba/Ughelli Road Portions

BY NOSA ERESOYEN, Asaba

.....

In the last two weeks, no fewer than 10 persons, especially motorists who ply Ejeme-Aniogor/Asaba/Ughelli road in Delta State, have been feared injured, while six others were reported to have died as a result of the "failed portions" of the road.

Mr. Random Kulven, the Federal Road Safety Commission (FRSC) Commander, Delta State Sector, told journalists in Asaba on Tuesday that most road accidents are often caused by the deplorable road condition, adding that Ejeme Aniogor/Asaba/Ughelli failed portions of roads, had been "death traps" for motorists, except those who drive with care.

Urging the state government to urgently find a lasting solution to the failed portions of the roads, Commander Kulven however warned motorists against over speeding and reckless driving, disclosing that officials of the Road Safety Commission would soon embark on monitoring of motorists along the expressway.

Investigation revealed that Ejeme Aniogor/Asaba/Ughelli failed portions call for emergency solution to further tragedy that currently bedeviled the motorists plying the road often times.

Expectedly, the dangerous conditions of the road project, it was reliably gathered, stems from the active action of water erosion fast developing into gully erosion.
