

Group flays killing of two policemen

THE Rivers State Sustainable Development Agency (RSSDA) has condemned the recent killing of two policemen in Rivers State.

It also sympathised with their families.

The late policemen were in company of the chairman of Opobo/Nkoro Local Government Area, who was on an assessment of the area when some suspected hired assassins struck.

General Manager, Corporate Services of the agency, Mr. Tonye Sukubo, said the agency was saddened by the "senseless killing."

"We are all created sacredly by the Almighty God and the least any fellow creature should do is to destroy the other," Sukubo lamented.

The tour was in line with the RSSDA's "Excellence in Local Governance Initiative," a programme designed to encourage best performing council boss in the state.

It expressed surprise that Rivers youths could still connive with outsiders to commit such crime despite the efforts of Amaechi-led administration to transform the rural areas and empower the youths.
