## Shot UNICAL lecturer dies

From Nicholas Kalu,  
Calabar

A LECTURER in the University of Calabar (UNICAL), Dr Godwin Iwatt, who was shot penultimate Tuesday by unknown gunmen in his office is dead. He died yesterday in the institution's teaching hospital.

Iwatt was an Examinations and Records Officer in the Department of Microbiology.

The university's spokesman, Effiong Eyo, said Iwatt died at 12.30pm.

Iwatt was shot in the stomach on May 6 in his office by an assailant, who is still at large.

He was rushed to the health centre and later transferred to the teaching hospital, where he was said to be responding to treatment.

"Though he seemed to be getting better, complications arose and efforts to keep him proved abortive," a hospital source said.
