Two died, one injured in train accident

TWO passengers were reportedly dead while one sustained injuries when two trains collided on Sunday in the Agege area of Lagos.

Lagos Railway District Manager (RDM) Akin Osinowo called on the families of the deceased to collect the bodies at the Federal Medical Centre (FMC), Ebute-Meta, with relevant information.

Osinowo said the two vic-

tims were passengers, who illegally hung on the rooftop of the moving train.

He added that the injured passenger was receiving treatment at an hospital.

The District Manager said NRC's Managing Director Adeseyi Sijuwade, had instituted a panel of enquiry to find out the immediate and remote causes of the incident.

According to him, members of the panel are the Di-

rectors of Operations, Electrical, Mechanical, Signal and Intelligent Unit.

Osinowo said: "The managing director directed the head of various departments to visit the site and interview eyewitnesses; visit the police station and make enquiries.

"And find out the main causes of the accident and determine the details and number of casualties.

"The families of the deceased should bring a docu-

mentary evidence to support their claim, evidence of identity of the bodies, evidence of their relationship with the dead and a sworn affidavit.

"After being certified, they will be referred to the police authority where we will ensure that the bodies are released to them."

He appealed to commuters and train users to value their lives and stop hanging on moving trains.
