

Confusion as corpse found in canal in Kwara community

CONFUSION rent the air on Monday at Ifedolapo community in Ilorin, the Kwara State capital, when a corpse was found under Osere bridge in the area.

Residents raised unanswered questions as to the cause of the death.

Some believe Friday night's rainstorm which destroyed many properties in Ilorin, could have been responsible for the death.

The Police Public Relations Officer (PPRO), in Kwara State, Ajayi Okasanmi, confirmed the development in an interview with the **News Agency of Nigeria (NAN)**.

He said he had already spoken with the Kwara Fire Service to evacuate the corpse.

After supervising the evacuation process, the Divisional Police Officer of 'B' Division, Surulere, Ilorin, Akinwale Olaoye, said Friday's heavy downpour would be the most likely cause.

He said there was no report of any missing person since Friday's rainstorm and described the situation as sudden unnatural death.

Olaoye added that investigation would continue to unravel the identity of the corpse.
