

## **Generator fumes kill two in Ijebu Ode**

**T**WO siblings Silifat Mayungbe and her brother have allegedly died after inhaling generator fumes in Ijebu Ode.

The incident occurred on Thursday at a house opposite the town's Central Mosque.

Investigations by our correspondent revealed that Silifat had put on the generator, following the failure of the Power Holding Company of Nigeria to supply electricity to the area.

It was gathered that the generator, which was put beside their room, was later moved in when there was a downpour. It was later moved into the sitting room of the siblings by the elder sister.

They later became unconscious after the duo inhaled the smoke emission of the generator.
