

Militants kill three in Kogi community attack

Gbenga Odogun, Lokoja

THREE persons have been killed by suspected militia in an early morning attack on Okofu community in Kogi Local Government Area of Kogi State.

The attack on Thursday also left several others with varying degrees of injuries

The latest killing, suspected to be a reprisal was coming on the heels of last weekend's incident, when seven persons were said to have been killed.

It was reliably gathered that the attack was carried out while worshippers in the community were observing their early morning prayers.
