A suspected murderer, Peter Adebayo has opened up to the Ondo State Police Command that he killed his friend known as ice.

Adebayo was arrested after he used a gas cylinder to hit his friend Lekan on the head leading to his death in state capital.

A source said the suspect had been arrested by men of the state police command while the body of the deceased

The source who narrated that incident said the two friends were indigenes of Ede, Osun state. According to the source, the deceased was known as ice, a crystal form of amphetamine-based drugs, shortly before killing his friend.

The source explained that the pipes used to take the ice were found in their room, and noted that both the victim and the incident happened.

The source said it was another friend of the victim who raised an alarm when he discovered the deceased in the room.

The source said: "We still don't know why he killed his friend. When we asked him, he was saying unintelligible things."

"It was the shouts of one of their friends, who hails from Delta state, that attracted our attention to the incident. We found Lekan in a pool of blood. He was still breathing. But shortly after, he died. We had to invite the police.

"Their Delta friend said Lekan was with him outside and that the victim later went into the room to help him. The victim was there for about 15 minutes and Lekan didn't come out, he had to go and check what had happened to him.

"According to him, he was prevented from entering the room by Adebayo, who said Lekan had gone out. But the boy had to go and peep through the window to find out what happened. It was then he saw Lekan lying on the floor.

Narrating what led him to kill his friend, Adebayo said he was the only one who took ice while the deceased was in the room. He killed his victim with a gas cylinder.

The State Police Public Relations Officer (PPRO), Olufunmilayo Odunlami, confirmed the incident. Odunlami said the police are conducting a CID for future investigation.
