

Collapsed Building

President of the Council for the Regulation of Engineering in Nigeria (COREN), Engineer H. A. Gumel, has said none of the council's certified engineers are linked with the failed building projects anywhere in the country. He said part of the criteria put in place by the law establishing the council is that any engineer wishing to practise in the country is mandated to register with COREN, failure of which he said such a practise is regarded as illegal and liable to sanctions by the council.
