Bandits have again killed nine persons in fresh attack on Bakkai community in Kankara Local Government Area of Katsina State.

This is coming as air strikes carried out by fighter jets of the Air Task Force of Operation Lafiya Dole yesterday killed many fighters of terrorist group, Boko Haram and destroyed many structures of the group in Warshale, northern Borno State.

The bandits were said to have stormed the community at about 1.00a.m on Sunday.

Locals said the bandits had earlier threatened to attack the community through an open letter, which made the villagers to invite vigilante officials for protection.

They said the bandits on arrival, shot sporadically, overpowered the vigilante officials and killed the victims on the spot.

The hoodlums also injured many other residents during the deadly invasion and rustled unspecified number of animals.
