A young nursing mother this week allegedly murdered her two-day old baby by injecting the baby with a poisonous substance believed to be Novan at Tyowanye in Buruku Local Government Area of Benue State.

According to an eye witness account, the young mother, whose name was given as Nguemo Tyokia, allegedly killed her newly born baby for no justifiable reasons as the baby was in sound health as at the time of birth.

Saturday Vanguard gathered that the lady allegedly carried out the bizarre act in her room while the baby was deep in sleep and most neighbours had gone out to the farms.

One of the locals said the little baby's persistent yell after being injected with the poisonous substance attracted neighbours who dashed to the house.
