There was confusion yesterday at Dela Mog school located at Raji Oba street, Iyana Ipaja area of Lagos, following the discovery of the lifeless body of one of the pupils inside a bucket.

The bucket where late Joy's body was found.

The circumstance under which the 10-year-old pupil, identified as Joy, died and was found inside the bucket could not be ascertained as at time of writing this report.

Late Joy, said to be the only child, had gone to school yesterday, hale and hearty.

But apprehension set in when she did not return home after closing hour. A search by some of the teachers round the school premises, led to the discovery of her remains inside a blue plastic bucket used to store water. But eye witnesses said there was no water inside the bucket as at the time she was found.
