Snake in WC bites NAF personnel to death in Abuja

By Kingsley Omonobi

A Nigerian Air Force personnel identified as Lance Corporal Bercy, has died after she got bitten by a poisonous snake when she sat on the toilet seat in her room.

It was gathered that the snake made its way into her toilet bowl (WC) and bit her on Saturday at her residence at the Air Force Base, Bill Clinton Way, Airport Road, Abuja.

She was rushed to the medical centre, but she didn't survive and was pronounced dead at the medical centre.

The snake is suspected to have found its way into her home through the septic tank to the waste dislodger.

A snake charmer was said to have been called after the incident to remove the huge reptile from the toilet.

Efforts to get the NAF authorities to speak on the development have so far proved abortive as text messages were not responded to.
